SCC – policy on using club equipment

The club owns climbing equipment for use by members, primarily during club meets. The committee, specifically the Gear Secretary, take responsibility for the storage and periodic inspection of this equipment.

All members using club equipment agree to:

- Inspect the equipment themselves prior to each use. Those who are uncertain about how to do this should seek help before using the equipment;
- To return all equipment to the Gear Secretary after use in a timely manner;
- To report damage to equipment and also any incidences that may have led to non-visible damage (such as a substantial fall)

The committee will consider requests by members to use club equipment on occasions other than during club meets. This will normally be allowed when the majority of those using the equipment are club members. Certain items can only be used on club meets, such as the static rope.
